

# Fix Corrupted Folder/File Records

This chapter covers the following topics:

- Description
  - Output
  - Batch Example
- 

## Description

### Program

B99130

### Function

Check all folders and files in the specified cabinet(s) and, if appropriate, correct the following:

- Invalid date and time fields are corrected (e.g. if the date field contains 0).
- The time when this utility is run is provided as the folder/file name, if the folder/file name is missing.
- A file that is not contained in a folder is linked to its original folder.
- Folders/files which were not deleted when utility B05130 *Move Folder Contents* was run are deleted. Objects contained in these folders/files are filed in folder Work.
- Folder/file names which were incorrectly converted from lowercase to uppercase are corrected. Any folder/file name that is not unique is renamed with the date and time this utility is run.
- The private flag is recovered for a file which is stored in a private folder.

Additionally, all folders within folder relationships can be canceled, i.e. each folder will then be a separate folder which is not contained in any other folder.

#### Note:

Once this utility is run, it is recommended that utility B99990 *Display Objects Renamed to Folder Name* is run to insure that any system folder fixed with utility B99130 *Fix Corrupted Folder/File Records* is restored to the appropriate name (i.e. Wastebasket, Inbasket).

## Online Input Screen

11:57 AM	* * * C O N - N E C T 3 * * *	11.Apr.99
Cabinet LS	Fix Corrupted Folder/File Records	B99130

Process the following folder definition records:

From Cabinet \_\_\_\_\_ to Cabinet \_\_\_\_\_

( '\*' for all cabinets)

Mark \_ to cancel all folder within folder relationships

Codes generated by output

- A - Date/time was corrected
- B - Folder/file name was generated
- C - File was recovered
- D - Folder within folder relationship was canceled
- E - Document was filed in folder Work
- F - Folder/file was deleted
- G - Folder/file name was converted to uppercase
- H - Private flag in folder/file was recovered

Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---

Menu Quit

Complete the information above and press ENTER to continue

## Utility Parameters

Parameter	Format	Description
From Cabinet	A8	
To Cabinet	A8	Optional
Cancel Relationships	A1	Optional

## Output

The resulting report contains the name of the cabinet, folder, file and ISN processed as well as at least one of the following action codes:

- A Date and/or time was corrected.
- B Folder/file name was generated.
- C File was recovered.
- D Folder within folder relationship was canceled.
- E Document was filed in folder Work.
- F Folder/file was deleted.
- G Folder/file name was converted to uppercase.
- H Private flag in folder/file name was recovered.

If action code F is returned, utility B99110 *Fix Corrupted Document Records* must be run.

## Batch Example

Check all folders contained in cabinet ESH. Folder within folder relationships are not canceled. This would be coded as follows:

```
LOGON SYSCNT2B
MENU
B99130 ESH
FIN
```
